OBJECTIVE

To leverage my analytical and programming expertise in data science and algorithm development to drive data-informed decision-making in a reputed organization while gaining practical experience in a professional environment.

EDUCATION

Bachelor of Engineering: Computer Science and Engineering Prince Shri Venkateshwara Padmavathy Engineering College Current CGPA: 7.6 / 10.0	09/2023 – 05/2027
HSC (Class XII) Montfort Secondary School Percentage: 72%	05/2023
SSLC (Class X) Montfort Secondary School Status: Passed	05/2021

EXPERIENCE

Data Specialist Intern Quadruple Automation Services - Analyzed large-scale healthcare datasets to build optimized data models. - Designed predictive algorithms to extract actionable insights for improved healthcare outcomes. - Utilized Python and Neo4j for data modeling and algorithm design.	05/2025 – 07/2025
--	-------------------

PROJECTS

Real-Time Multi-Face Attentiveness Detection - Developed a computer vision system to monitor user focus levels and distraction in real-time. - Implemented facial landmarks and gaze estimation techniques to analyze multiple faces simultaneously.
Facial Recognition-Based Attendance System - Built a real-time attendance marking system using OpenCV and Python. - Automated tracking processes to reduce manual effort and improve marking accuracy.

ADDITIONAL DETAILS

GD Round Score: 6 Leadership: Campus Organizer for Google Developer Group (GDG). Certifications: Technical Internship with QAS; Paranox 2.0 Hackathon Pitching Round.
